

# OUR PROGRAMS

The SEA SCHOOL OF FUTURE GENERATIONS is a platform that hosts ASIE's three key programs:

## CHILD AND ADOLESCENT HEALTH PROGRAM

- ✔ **Objective:** To improve equity in the access to health and immunization services
- ✔ **Areas of work:** Disease prevention and health promotion, human resources for health, E-health and M-health, and advocacy

## INNOVATIVE EDUCATION AND TRAINING PROGRAM

- ✔ **Objective:** To improve the quality of education methods and solutions for disadvantaged children and adolescents
- ✔ **Areas of work:** Instructional system design, training of teachers, E-learning/ M-learning

## EQUAL ACCESS TO HEALTH AND EDUCATION PROGRAM

- ✔ **Objective:** To bring quality health and education services to the poorest and most vulnerable populations
- ✔ **Areas of work:** Advocacy campaign, community empowerment, policy dialogue.

## PAVING THE PATH FOR HEALTHIER, MORE EDUCATED FUTURE GENERATIONS

Through innovative solutions for the welfare of children and adolescents

Child and adolescent health  
Innovative education and training  
Equal access to health and education

# WHO WE ARE

## OUR STORY

**ASIE started with the challenging question:**  
*How can we best continue supporting Viet Nam and Southeast Asia?*

As a group of four colleagues and friends employed by a French NGO and a consulting firm, we have been working for non-profit interventions in Southeast Asia and Viet Nam for over five years. We have witnessed the challenges of addressing poverty and inequitable access to health services and education as well as unacceptable living conditions.

Indeed, in Southeast Asia (SEA), children and adolescents from low-income families are the victims of unequal access to health and education. Further complicating the matter, international donors and INGOs are decreasing, withdrawing their financial and technical support at national and regional levels. Therefore, in order to continue supporting SEA, we established ASIE – Action pour la Santé Internationale et l'Education / Action for International Health and Education.

We believe in the need to address impediments that are both the causes and results of poverty in low- and middle-income countries: the cycle of poverty and poor health, gaps in education and unacceptable living conditions.

## OUR MISSION

ASIE is a French development and nonprofit organization (Loi 1901). It commits to reducing inequities in access to health care, education and higher standards of living among the most vulnerable communities. Its mission is to aid children and adolescents in Southeast Asia.

The founders of ASIE are engaged in supporting sustainable interventions for disadvantaged populations to shape a better future for their children.

## OUR VISION

The long-term vision of ASIE is translated into the SEA **SCHOOL OF FUTURE GENERATIONS** that comprises three key strategic areas of work:

- ✔ Health
- ✔ Education
- ✔ Poverty and inequality reduction

The objective of the **SCHOOL OF FUTURE GENERATIONS** is to mobilize and coordinate resources and experts for:

- ✔ Reinforcing child and adolescent health
- ✔ Pioneering education and learning methods
- ✔ Improving standards of living

# OUR PRIORITY COUNTRIES

## OUR APPROACH IS BASED ON

- ✔ Building on existing experience
- ✔ Mobilizing partnerships and collaboration
- ✔ Enhancing capacity of local and national stakeholders
- ✔ Empowering the most vulnerable populations
- ✔ Harnessing transformative solutions and innovations
